EDUCATION

B.Tech | CSE(Data Science), Techno Main Saltlake | CGPA 6.95 Jul 2022 – Present

Higher Secondary, G.S LAL College | 75.4 % Apr 2020 – Mar 2022

Secondary School, Edwards English School | 64.4 % 2020

INTERNSHIP

Application Developer, Peermart Nov 2024 – Apr 2025

- Led Flutter-based frontend development for a cross-platform app with 4+ core modules (**Chat, Account, Product Details, PeerShort**), serving **5,000+ active users**.
- Integrated real-time backend functionalities (chat, location-based listings, short-form videos) via Firebase, reducing latency and **improving app responsiveness**.
- Collaborated with backend and UI/UX **teams of 6+ members** to deliver a scalable **solution with 99.9% uptime**.

Generative AI Virtual Internship, AICTE Jul 2024 – Sep 2024

- Trained and fine-tuned **AI models on Google Cloud** using Google’s Generative AI tools. Developed some projects including text summarization, content generation, and chatbot automation.
- Optimized** AI response accuracy **by 20%** and reduced latency **by 15%** through **fine-tuning models**.
- Gained a deep understanding of **Responsible AI practices** and the ethics behind modern AI tools.

Android Developer Virtual Internship, AICTE Apr 2024 – Jun 2024

- Worked on developing new Android app features using **Kotlin and MySQL** for data management.
- Enhanced** data retrieval speed by 18% and refined app interface based on user feedback.
- Strengthened knowledge in **API integration, debugging, and version control**.

SKILLS

• Language JAVA	• Development HTML, CSS, JS, React, Flutter	• Databases/API MySQL
• Tools Git, GitHub	• Data Analysis and BI Tools Power BI, Tableau, Excel, PowerPoint	

PROJECTS

Friend - Connect, Share, Help, App Link Jul 2025 – Dec 2025

- Tech Stack:** Flutter, Spring Boot, MySQL, JWT
- Developed a cross-platform social networking application with JWT-based authentication, real-time messaging.
- Implemented an SOS emergency alert system with location-based notifications, along with community and follow features.
- Designed leaderboard and profession-based content filtering to enhance user engagement and personalization.

Water Footprint Calculator, Github Jun 2024 – Oct 2024

- Tech Stack:** Flutter, TensorFlow, Firebase
- Engineered a cross-platform app using AI and TensorFlow-based image recognition to estimate **users’ daily water footprint**.
- Promoted water conservation awareness by delivering a tech-driven sustainability tracking solution.

Ekagrata- Focus app, Github Feb 2024 – May 2024

- Tech Stack:** Flutter, and Firebase.
- Created an app that helps users **stay focused** by blocking distracting apps.
- During testing, users stayed focused **30 minutes longer each day** and app usage **increased by 40%**.
- Learned how to design a clean **UI**, keep the app **easy to use**, and handle **real-time data**.

CERTIFICATES

JavaScript Projects Course — By Udemy | Python for Data Science — By Udemy |

Complete Figma course on Web and Mobile — By Udemy

ACHIEVEMENTS

- Led a team of 10 in the **Technical & Graphics** Wing of The **Sports & Educational** Club at Techno Main Saltlake, Kolkata.
- Led a 6-member team at the **Smart Bengal Hackathon** and secured **5th place** among 100+ participating teams.
